Experience

- May 2021 – **Data Scientist Intern**, *Aureks, Remote.*
Present
 - Maintain ML pipeline which included:
 - Kmeans clustering to maintain semantically similar keywords in clusters
 - Used Spacy for finding semantic similarities between words. Word embedding vectors were used to find distance between new keyword and cluster
 - Applied PCA for dimension reduction of word embedding vectors
 - Assigning new data relevant clusters
 - Passing the new words to Fbprophet time series framework to predict Cost-Per-Click of the keywords
 - Maintaining Data pipeline through MongoDB and pymongo

Dec 2018 – **Project Coordinator**, *Reliance Engineering Company, Multan, Pakistan.*
Jan 2020
Aug 2017 – **G & E (Telecom Integration) Engineer**, *ZTE Corporation, Islamabad, Pakistan.*
Oct 2018
Aug 2016 – **Site Engineer**, *Reliance Engineering Company, Multan, Pakistan.*
